Virtual Set Design

Fully Branded Immersive Environment

Designed to match your branding, built in Cinema 4D, and rendered in real-time in our studio control room infrastructure, while talent stands on our green screen. The in-studio presenters appear in a fully immersive virtual environment stylized to match your branding and present slide decks, interview remote guests, read from a teleprompter, and more.

**See examples of custom set designs beside the final product in our studio on page 10.*

Custom Set Builds

Our experienced production design team works closely with clients to conceptualize and design custom-built sets tailored to the unique needs of your shoot. From 3D renderings to the final set pieces, our designers collaborate with skilled carpenters and scenic artists to transform ideas into fully realized environments — all built to meet our studio specs.
